PORSCHE 911 GT3 RS

"There is no substitute"

introduced in 1999 as part of the first generation of the Porsche 996 model range (commonly known as 996.1 as a homologation model for the cars entered in the FIA GT3 cup. As with Porsche's previous 911 RS models, the 996 GT3 was focused on racing, and so was devoid of items that added unnecessary weight to the car. Sound deadening was almost completely removed, as were the rear seats, rear loud speakers, sunroof, and air conditioning, although automatic air conditioning and CD/radio became no-cost optional add-ons.

"There is no a substitute"

The first models of the 911 had a rear-mounted 130 hp (97 kW) Type 901/01 flat-6 engine, in the "boxer" configuration like the 356. The engine is air-cooled and displaces 1,591 cc (2.0 L), as compared to the 356's four-cylinder, 1,582 cc (1.6 L) unit. The car had four seats, although the rear seats were small, then it is usually called a 2+2 rather than a four-seater (the 356 was a 2+2). A four or five-speed Type 901 manual transmission was available.

Fast and Powerfull

Porsche introduced the Porsche 911 GT3 RS, an even more track-focused version of the 996 GT3. RS is short for the German RennSport, literally "racing sport" in English. The "RS" moniker, and the characteristic lightweight blue or red wheels and "GT3 RS" side stickers link the 996 GT3 RS to historically important Porsches such as the Carrera 2.7 R of the early 1970s.

HONDA Acura

1990-2005

The Honda NSX, marketed in North America as the Acura NSX, is a two-seater, rear mid-engine, rear-wheel drive sports car manufactured by Honda.

The origins of the NSX trace back to 1984, with the HB-X (Honda Pininfarina eXperimental) concept, for a 2.0 L (100 cu in) V6 rear mid-engine, rear-wheel drive sports car. Honda committed to the project, with the intention of meeting or exceeding the performance of the then V8 engine Ferrari range, while offering reliability and a lower price point. The concept thus evolved and had its name changed to NS-X, which stood for 'New', 'Sportscar' eXperimental', although the production model was launched as the NSX.

Gordon Murray, the designer of the McLaren F1 supercar, stated that he used the NSX as the inspiration for the F1 after test driving many high performance cars and finding the NSX chassis performed the best. Murray stated that the design was 'monumental' to sportscar design. He found that the car could easily have handled more power and attempted to convince Honda to develop a more powerful engine, but they declined.

The Audi R8, based on the Audi Le Mans quattro concept car (designed by Frank Lamberty and Julian Hoenig) first appeared at the 2003 International Geneva Motor Show and the 2003 Frankfurt International Motor Show. The R8 road car was officially launched at the Paris Auto Show on 30 September 2005. There was some confusion with the name, which the car shares with the 24 Hours of Le Mans winning R8 Le Mans Prototype (LMP). Initial models included the R8 4.2 FSI coupé (with a V8 engine) and R8 5.2 FSI coupé (with a V10 engine). Convertible models, called the Spyder by the manufacturer, were introduced in 2008.

And I don't talk shit about you on the internet Never told anyone anything bad 'Cause that shit's embarrassing, you were my everything And all that you did was make me fucking sad So don't waste the time I don't have And don't try to make me feel bad I could talk about every time that you showed up on time But I'd have an empty line 'cause you never did Never paid any mind to my mother or friends So I shut 'em all out for you 'cause I was a kid

Fever dream high in the quiet of the night You know that I caught it Bad, bad boy Shiny toy with a price You know that I bought it Killing me slow, out the window I'm always waiting for you to be waiting below Devils roll the dice, angels roll their eyes What doesn't kill me makes me want you more And it's new, the shape of your body It's blue, the feeling I've got And it's ooh, whoa, oh It's a cruel summer
